Supporting Students with Prevalent Medical/Health Conditions at Matthews Hall

To ensure children with potentially life-threatening medical conditions remain safe while attending school, Matthews Hall requires that parents/guardians update the necessary medical information of their child's health information form each year and regularly update the school of any changes to this information. This allows us to create an **Individual Plan of Care** for the student which is reviewed by administration, staff and teaching faculty. Medical conditions considered potentially life-threatening may include:

1. **Asthma**
2. **Anaphylaxis**
3. **Epilepsy**
4. **Type 1 Diabetes**
5. Any other potentially **life-threatening condition** that could result in a medical incident. A medical incident is a circumstance that requires an immediate response and monitoring, which may progress to an emergency requiring contact with Emergency Medical Services – 911.

Parents/guardians are expected to be active participants in supporting the management of the student's prevalent medical condition(s) while the student is in the school. **It is the responsibility of the parents/guardians to inform the school of such conditions to ensure the student's safety at school.**
